In a broadcast devoted mainly to the US foreign aid program, Mr. Lewis made a passing reference to Radio Free Europe as follows:

...We are officially embarking upon a program of supporting the Communist dictators and helping them to keep those tragic people under continued tyranny and misery. There is no other interpretation possible. It is that and clearly that we have undertaken the exact policy for which Radio Free Europe and the Voice of America have been flying experimental kites for more than two years, and while denying that they are doing so, that a Communist dictator is all right as long as he is not a Russian Communist dictator.
